To Whom it may concern,

Ramsgate RSL engaged McCann Construction and Property to complete a near full Club refurbishment, including the gaming floor, lounge, multiple bar and function areas, full Club façade, in addition to mechanical and lighting upgrades. McCann Construction and Property delivered the project on time, within budget and to a high standard.

Most stages of the refurbishment involved operational areas of the Club, which required careful and safe management of construction activities, whilst maintaining near full club operations. McCann Construction excelled at managing this complex work site, creating a safe environment for employees, members and guests while construction was underway.

A key strength of McCann Construction was their collaborative approach to the project, working with the Ramsgate RSL team during each stage to ensure expectations were clear and understood. This approach, underpinned by the professional management of all facets of the project (such as minuted site meetings), provided confidence to the Ramsgate RSL team and ensured the successful delivery of the project.

We would highly recommend McCann Construction and Property for their construction and design capability, and professional project management.

Regards

David Moorcroft
Chief Executive Officer
Ramsgate RSL Memorial Club Ltd.
